## ADDITIONAL SHEET

CCR #: 00-0991 Rev: \_ Originator: Evan Winston

Telephone: 301.925.0348 Office: DEV/CO

Title of Change: Test Executable 6A.01\_DDIST.02 to VATC, PVC.. Distribution Threads are not working as expected.DDIST does not pass priority to STMGT on Retrieval.

CM: PLEASE, build Sun TAR file for the listed files from the 6A.01 baseline and provide to the SMC.

executable directory

/ecs/formal/DSS/bin/sun5.5/EcDsDistributionServer

lib directory:

/ecs/formal/DSS/lib/sun5.5

libs:

libDsDdSSh.so

libDsDd8mmTapeSh.so

libDsDdFtpPushSh.so

libDsDdFtpPullSh.so

libDsDdBSh.so

SMC: Receive the TAR file(s) and make available to the PVC and VATC.

DAAC Install Instructions: Change requested by VATC--

TE can be loaded on top of DDIST installations of 6A.01. The previous TE 6A.01\_DDIST.01 is obsolete and should not be used.

- 1. Get File from SMC distribution;
- 2. UNTAR the files and place in staging area.
- 3. On the DataDistribution Server Platform do the following using the 'cp' from the command line to replace files:

REPLACE all occurrances of the files included with this TE mode-by-mode, using the same permissions levels and ownerships as previous file.

The EcDsDistribution Server is placed in the following dir.: /usr/ecs/<mode>/CUSTOM/bin/DSS/

The lib files are placed in the following dir.: /usr/ecs/<mode>/CUSTOM/lib/DSS/

## RESOLUTION of the FIX: NCR 27584

- The function PriorityQueue::AddRequest interface is changed to exactly match that of its virtual parent so that the polymorphic mechanism used in calling the function actually calls the intended function and does not default to calling merely the parent.
- Checks have been added to make sure that this condition: (# of worker threads > Sum of priority threads) exists at server startup time and at runtime when priority threads are seized.
   (The default # of worker threads is changed to 228 in the mkcfg)
- New debug output includes a summary of the priority queue as request are being added and removed from the queue.
   (This increases debug output by about 20-40 lines per request)

RESOLUTION of the FIX: NCR 27993
The DsStArchive Retrieve() function is now called with the request priority as the argument
